

**IN THE CLAIMS**

Please amend claims 74, 75, 76, 79, 82, 83, 90, 98 and 101, as shown below.  
Please add new claim 102. The following is a complete listing of the claims including status.

1-73. (Cancelled)

74. (Currently amended) A method of regulating access to electronic content,  
the method comprising:

collecting notification information from a recipient of electronic content  
in response to an attempt to access the electronic content;

initiating transmission of ~~transmitting~~ the collected notification  
information to an address other than that of an immediate sender of the  
electronic content; and

selectively controlling access to the electronic content based on a result  
of the transmission of the notification information.

75. (Currently amended) A method for acquiring information, comprising the  
steps of:

~~transmitting electronic data having computer executable instructions to a  
first computer; and~~

receiving notification information in response to an attempt to access  
electronic data having ~~the execution of the~~ computer executable instructions,

wherein the notification information is collected by executing

the executable instructions when triggered by an event at one or more successive computers other than the first computer and the notification information is received at a network address other than a network address transmitting the electronic data.

76. (Currently amended) The method of claim 75, further comprising the ~~steps~~ step of:

tracking the one or more successive computers that receive the electronic data based on the receipt of the notification information from the one or more successive computers.

~~communicating the electronic data to the one or more successive computers;~~

~~of transmitting the collected notification information to a network address other than the network address of the first; and~~

~~executing the computer executable instructions at the one or more successive computers when triggered by the event.~~

77. (Previously presented) The method of claim 75, further comprising the step of matching an identifier in the notification information with an identifier in a table to compute a charge.

78. (Previously presented) The method of claim 77, wherein the charge is a usage charge.

79. (Previously presented) The method of claim 77, wherein the identifier is at least any one of a user identifier that created the electronic data, an address receiving the notification information, an identifier of the electronic content, and an address specified when the electronic data was created.

80. (Previously presented) The method of claim 75, wherein the electronic data comprises at least any one of an envelope and one or more files.

81. (Previously presented) The method of claim 75, wherein a portion of the electronic data includes electronic content other than the executable instructions.

82. (Currently amended) The method of claim 81, wherein the executable instructions ~~denies~~ deny access to the electronic content until the collected notification information has been transmitted to the network address other than the network address transmitting the electronic data.

83. (Currently amended) The method of claim 82, wherein the executable instructions selectively ~~denies~~ deny access to a part of the electronic content.

84. (Previously presented) The method of claim 81, wherein the electronic content includes at least any one of a text file, a graphics file, an audio file, a video file, an instruction file, and a program file.

85. (Currently amended) The method of claim 75, wherein the event is at least one of:

- (i) an attempt by a user to access the electronic data;
- (ii) an attempt by a user to save the electronic data;
- (iii) an attempt by a user to delete the electronic data; ~~and~~ or
- (iv) an attempt by a user to list the electronic data.

86. (Previously presented) The method of claim 75, wherein the notification information includes user information collected by querying a user for personal information.

87. (Previously presented) The method of claim 75, wherein the notification information at least in part includes one of market data and demographic data.

88. (Previously presented) The method of claim 75, further comprising prompting for user identification at the one or more successive computers.

89. (Previously presented) The method of claim 88, further comprising granting access to at least a portion of the electronic data based on the user identification.

90. (Currently amended) A method for assessing fees or controlling information, comprising the steps of:

receiving electronic data having at least in part computer executable instructions from a sending computer;

transmitting the received electronic data and executable instructions to one or more successive computers; and

wherein ~~executing~~ the computer executable instructions are executed at the one or more successive computers and upon ~~receipt~~ transmission of an authorized user identifier at to a network address other than a network address of the sending computer, access is granted ~~granting access~~ to at least a portion of the electronic data.

91. (Previously presented) The method of claim 90, further comprising updating information based on the authorized user identifier.

92. (Previously presented) The method of claim 91, wherein the updating information is a usage charge.

93. (Previously presented) The method of claim 90, further comprising the step of obtaining user information when the computer executable instructions are executed.

94. (Previously presented) The method of claim 93, wherein the user information includes at least any one of a personal information, a market information, and a demographic information.

95. (Previously presented) The method of claim 93, further comprising the step of computing a charge when the user information is received at a network address other than a network address of the sending computer.

96. (Previously presented) The method of claim 95, wherein the user information includes at least any one of a personal information, a market information, and a demographic information.

97. (Previously presented) The method of claim 90, further comprising denying access to at least part of the electronic data until user information is received at the network address other than the network address of the sending computer.

98. (Previously presented) The method of claim 90, wherein the electronic data is ~~transmitted by~~ received from a server.

99. (Previously presented) The method of claim 90, further comprising encrypting at least a part of the electronic data.

100. (Previously presented) The method of claim 90, further comprising the step of receiving an access granting message at the one or more successive computers.

101. (Currently amended) The method of claim 74, further comprising the steps of:

transmitting the electronic content from the computer collecting the notification information to one or more successive computers; and  
wherein ~~receiving~~ an access granting message is sent to at the one or more successive computers to selectively control access to the electronic information.

102. (New) The method of claim 90, wherein the granting access to at least a portion of the electronic data is also based in part on the result of a transmission of notification information.
